### **HealthSelect updates list of network lab providers**

**O**n September 1, the list of lab providers on the HealthSelect network was revised. It's important that members use HealthSelect of Texas network providers whenever possible. Using a non-network provider will cost you more money, including a deductible, higher coinsurance, and all of the charges not covered by insurance.

Ask your physician which lab provider they use. If it's a non-network provider, ask them to use a lab that is in the HealthSelect network. For a list of network labs and other providers visit [www.healthselectoftexas.com](http://www.healthselectoftexas.com).
